IF METHODS EXPLAINED

WHAT IS INTERMITTENT FASTING?

An eating pattern that cycles between fasting and eating windows.

It's about WHEN you eat, not necessarily WHAT you eat.

POPULAR METHODS:

16:8 METHOD (most popular for beginners)

Fast 16 hours, eat within 8-hour window

Example: Eat 12pm-8pm, fast 8pm-12pm

18:6 METHOD (intermediate)

Fast 18 hours, eat within 6-hour window

Example: Eat 1pm-7pm, fast 7pm-1pm

20:4 METHOD (advanced)

Fast 20 hours, eat within 4-hour window

Example: Eat 3pm-7pm, fast 7pm-3pm

OMAD - One Meal A Day (advanced)

Eat one large meal, fast the remaining 23 hours

START WITH 16:8 and work up as your body adapts.

Most people see results with 16:8 alone.

GETTING STARTED GUIDE

WEEK 1: Ease into it

- Start by pushing breakfast 1-2 hours later each day
- Stop eating 2-3 hours before bed
- Drink water, black coffee, or plain tea during fasting

WEEK 2: Find your window

- Settle into your chosen eating window
- Notice energy patterns and adjust timing
- Eat nutritious meals (don't binge during eating window)

DURING FASTING, YOU CAN HAVE:

- Water (add lemon/electrolytes if needed)
- Black coffee (no cream, sugar, or sweetener)
- Plain tea (green, herbal, black)
- Sparkling water

DURING EATING WINDOW, FOCUS ON:

- Protein at every meal
- Vegetables and fiber
- Healthy fats
- Adequate calories (don't under-eat!)

STOP FASTING IF: you feel dizzy, faint, nauseous beyond the first week of adjustment, or have a medical condition.
