WHAT IS A VISION BOARD & WHY IT WORKS

A vision board is a visual representation of your goals, dreams, and the life you want to create. It works because:

THE SCIENCE:

- Reticular Activating System (RAS): Your brain filters millions of data points daily. When you focus on something visually, your RAS starts noticing opportunities aligned with those goals.
- Visualization activates the same brain regions as actual experience, building neural pathways toward your goals.
- Written goals are 42% more likely to be achieved.

HOW TO USE THIS WORKBOOK:

1. Assess where you are NOW in each life area (honestly)
2. Dream about where you WANT to be (no limits!)
3. Set specific goals with action steps
4. Create your physical vision board (images + words)
5. Review daily, take action monthly, adjust quarterly

SUPPLIES FOR YOUR VISION BOARD:

- Poster board or cork board
- Magazines, printed images, quotes
- Scissors, glue, tape, markers
- Stickers, washi tape (optional)
- A photo of yourself (put it in the center!)

Place it where you'll see it DAILY.
