

THE SLEEP WORKBOOK

CBT-I Techniques for Better Sleep Without Medication

Evidence-Based Strategies for
Overcoming Insomnia Naturally

UNDERSTANDING INSOMNIA

CBT-I (Cognitive Behavioral Therapy for Insomnia) is the #1 recommended treatment for chronic insomnia - even above medication.

WHY CBT-I WORKS:

- Addresses the ROOT CAUSES of insomnia, not just symptoms
- Effects last long after treatment (unlike sleeping pills)
- No side effects, no dependency
- Recommended by the American Academy of Sleep Medicine

THE 3P MODEL OF INSOMNIA:

Predisposing: You may be naturally lighter sleeper

Precipitating: A stressful event triggered the insomnia

Perpetuating: HABITS you developed that now maintain it

COMMON PERPETUATING HABITS:

- Going to bed too early (lying awake builds anxiety)
- Staying in bed when not sleeping (bed = awake place)
- Napping during the day (reduces sleep drive)
- Clock watching (increases frustration)
- Compensating (caffeine, sleeping in on weekends)
- Worrying about sleep (creates hyperarousal)

THIS WORKBOOK COVERS:

1. Sleep diary (track your actual patterns)
2. Sleep restriction (counterintuitive but powerful)
3. Stimulus control (retrain your brain about bed)
4. Cognitive restructuring (stop worry about sleep)
5. Relaxation techniques
6. Sleep hygiene optimization

SLEEP DIARY - DAY 1

Date: ____/____/____

EVENING:

What time did you get into bed? ____:____ am/pm

What time did you try to fall asleep? ____:____ am/pm

Did you take any sleep medication? ☐ Yes: _____ ☐ No

Caffeine today? ☐ No ☐ Yes - last at ____:____

Alcohol today? ☐ No ☐ Yes - amount: ____

Exercise today? ☐ No ☐ Yes - type/time: ____

Nap today? ☐ No ☐ Yes - duration: ____ min

MORNING (fill in when you wake up):

How long did it take to fall asleep? ____ minutes

How many times did you wake up? ____

Total time awake during night? ____ minutes

What time was your final wake-up? ____:____ am/pm

What time did you get out of bed? ____:____ am/pm

CALCULATIONS:

Time in bed (TIB): ____ hours ____ min

Total sleep time (TST): ____ hours ____ min

Sleep efficiency: $TST / TIB \times 100 =$ ____%

(Goal: 85% or higher)

RATINGS:

Sleep quality (1-5): ____

Daytime fatigue (1-5): ____

Daytime functioning (1-5): ____

Mood today (1-5): ____

Notes: _____

SLEEP DIARY - DAY 2

Date: ____/____/____

EVENING:

What time did you get into bed? ____:____ am/pm

What time did you try to fall asleep? ____:____ am/pm

Did you take any sleep medication? ☐ Yes: _____ ☐ No

Caffeine today? ☐ No ☐ Yes - last at ____:____

Alcohol today? ☐ No ☐ Yes - amount: ____

Exercise today? ☐ No ☐ Yes - type/time: ____

Nap today? ☐ No ☐ Yes - duration: ____ min

MORNING (fill in when you wake up):

How long did it take to fall asleep? ____ minutes

How many times did you wake up? ____

Total time awake during night? ____ minutes

What time was your final wake-up? ____:____ am/pm

What time did you get out of bed? ____:____ am/pm

CALCULATIONS:

SLEEP RESTRICTION THERAPY

Sleep restriction SOUNDS scary but it's the most powerful CBT-I tool. You temporarily limit time in bed to match actual sleep.

STEP 1: Calculate your average sleep time from diary

Week 1 average TST: ___ hours ___ min

(Add up 7 days of total sleep time, divide by 7)

STEP 2: Set your sleep window

Your time in bed = average TST (minimum 5.5 hours)

My sleep window: ___ hours ___ min

STEP 3: Choose a fixed wake time (7 days/week)

My wake time: ___:___ am (non-negotiable, even weekends)

STEP 4: Calculate bedtime

Wake time minus sleep window = bedtime

My bedtime: ___:___ pm (do NOT get in bed before this)

STEP 5: Adjust weekly

If sleep efficiency > 90%: add 15 min (earlier bedtime)

If sleep efficiency 85-90%: keep same window

If sleep efficiency < 85%: reduce 15 min (later bedtime)

WEEKLY ADJUSTMENTS:

Week 1 efficiency: ___% -> New bedtime: ___:___

Week 2 efficiency: ___% -> New bedtime: ___:___

Week 3 efficiency: ___% -> New bedtime: ___:___

Week 4 efficiency: ___% -> New bedtime: ___:___

NOTE: You WILL feel tired at first. This is temporary.

The sleep pressure you build = deeper, better sleep.

STIMULUS CONTROL

Your brain has learned to associate bed with WAKEFULNESS.

Stimulus control retrains the bed = sleep connection.

THE RULES (follow them strictly for 4+ weeks):

1. Use the bed ONLY for sleep and intimacy

No TV, phone, reading, eating, worrying in bed

Rate your compliance (1-5): ____

2. Only go to bed when sleepy (not just tired)

Sleepy = eyes heavy, head nodding, yawning

NOT: 'I should go to bed because it's late'

Rate your compliance (1-5): ____

3. If you can't sleep after ~15-20 min, GET UP

Go to another room. Do something boring/calming.

Return ONLY when sleepy again. Repeat as needed.

Rate your compliance (1-5): ____

4. Wake at the same time EVERY morning

Regardless of how much you slept. No sleeping in.

Including weekends. (This anchors your rhythm.)

Rate your compliance (1-5): ____

5. No napping during the day

If desperate: maximum 20 min before 2pm

Rate your compliance (1-5): ____

WHAT TO DO WHEN UP AT NIGHT:

Dim lights, boring book, gentle stretching, knitting

Do NOT use screens, eat, exercise, or do work

COGNITIVE RESTRUCTURING

Challenging Worried Thoughts About Sleep

Worrying about sleep CAUSES poor sleep. Challenge these thoughts:

COMMON SLEEP WORRY: 'I won't function tomorrow if I don't sleep'

Challenge: You've functioned on bad sleep before. You can cope.

Balanced thought: _____

COMMON SLEEP WORRY: 'I need 8 hours or I'll get sick'

Challenge: Sleep needs vary. Quality > quantity.

Balanced thought: _____

COMMON SLEEP WORRY: 'Something is seriously wrong with me'

Challenge: Insomnia is common and treatable. Not dangerous.

Balanced thought: _____

COMMON SLEEP WORRY: 'I'll never sleep normally again'

Challenge: CBT-I works for 70-80% of people. Be patient.

Balanced thought: _____

MY TOP SLEEP WORRIES:

1. _____

Challenge: _____

2. _____

Challenge: _____

3. _____

Challenge: _____

PROGRESSIVE MUSCLE RELAXATION

Do this in bed when trying to sleep. Takes 10-15 minutes.

Tense each muscle group 5 seconds, release 15 seconds.

SEQUENCE (go slowly through each):

1. Feet: Curl toes tightly... release
2. Calves: Point toes toward face... release
3. Thighs: Squeeze thighs together... release
4. Buttocks: Clench... release
5. Stomach: Pull belly button to spine... release
6. Chest: Take deep breath, hold... release
7. Hands: Make tight fists... release
8. Arms: Flex biceps... release
9. Shoulders: Shrug to ears... release
10. Neck: Gently press head into pillow... release
11. Face: Scrunch all facial muscles... release
12. Whole body: Tense everything at once... release

TIPS:

- Focus on the CONTRAST between tense and relaxed
- Breathe in while tensing, out while releasing
- If your mind wanders, gently come back to the muscle
- Don't worry about doing it 'perfectly'
- Practice daily, even on good sleep nights

EFFECTIVENESS LOG:

Date: ____ Relaxation level after (1-10): ____

Date: ____ Relaxation level after (1-10): ____

Date: ____ Relaxation level after (1-10): ____

SLEEP HYGIENE CHECKLIST

ENVIRONMENT (your bedroom should be a sleep cave):

- ☐ Room is dark (blackout curtains, no LEDs)
- ☐ Room is cool (65-68F / 18-20C ideal)
- ☐ Room is quiet (earplugs or white noise)
- ☐ Comfortable mattress and pillows
- ☐ No TV in bedroom
- ☐ Phone charges OUTSIDE bedroom (or far from bed)

TIMING:

- ☐ Consistent wake time 7 days/week
- ☐ No caffeine after 2pm (or 8 hours before bed)
- ☐ No alcohol within 3 hours of bedtime
- ☐ No heavy meals within 2 hours of bedtime
- ☐ No vigorous exercise within 3 hours of bed
- ☐ Wind-down routine 30-60 min before bed

DAYTIME:

- ☐ Get bright light exposure within 30 min of waking
- ☐ Exercise regularly (but not too late)
- ☐ Limit naps (none or <20 min before 2pm)
- ☐ Manage stress during the day

MY SLEEP HYGIENE IMPROVEMENTS TO MAKE:

This week I'll fix: _____

Next week I'll fix: _____

CAFFEINE / ALCOHOL / SCREEN AUDIT

These three sabotage sleep more than anything else. Be honest:

CAFFEINE AUDIT:

Sources I consume: ☐ Coffee ☐ Tea ☐ Soda ☐ Energy drinks

☐ Chocolate ☐ Pre-workout ☐ Other: _____

Total daily caffeine: approximately ____ mg

My last caffeine of the day is at: ____:____ pm

Caffeine half-life is 5-7 hours. If bed at 10pm,

last caffeine should be: ____ pm at latest

My caffeine change plan: _____

ALCOHOL AUDIT:

Drinks per week: ____

Do I use alcohol to help me sleep? ☐ Yes ☐ No

TRUTH: Alcohol causes lighter sleep, more waking, less REM

My alcohol change plan: _____

SCREEN AUDIT:

Last screen use before bed: ____ min before

Screens in bedroom: ☐ Phone ☐ TV ☐ Tablet ☐ Laptop

Blue light suppresses melatonin for 2+ hours after use

My screen change plan: _____

ONE CHANGE I'LL MAKE THIS WEEK:

WORRY JOURNAL

Dump Worries Before Bed (Not IN Bed)

30 minutes before bed, spend 10 min writing worries HERE.

When they pop up in bed: 'I already dealt with that. It can wait.'

Date: ____/____/____

What's on my mind:

Can I solve this tonight? [☐] No (let it go) [☐] Yes (action: _____)

Date: ____/____/____

What's on my mind:

Can I solve this tonight? [☐] No (let it go) [☐] Yes (action: _____)

Date: ____/____/____

WHEN TO SEE A SLEEP SPECIALIST

CBT-I works for most people, but see a doctor if:

- [] You've tried CBT-I consistently for 6+ weeks with no help
- [] You snore loudly or have been told you stop breathing
- [] You have restless legs that prevent sleep
- [] You fall asleep uncontrollably during the day
- [] You have unusual behaviors during sleep (acting out dreams)
- [] Your insomnia started after a medication change
- [] You have significant depression or anxiety with insomnia

POSSIBLE SLEEP DISORDERS TO RULE OUT:

- Sleep Apnea (breathing stops during sleep)
- Restless Leg Syndrome (irresistible urge to move legs)
- Narcolepsy (excessive daytime sleepiness)
- Circadian Rhythm Disorders (body clock misaligned)
- Parasomnias (sleepwalking, sleep talking)

HOW TO FIND A SLEEP SPECIALIST:

- Ask your primary care doctor for a referral
- Look for board-certified sleep medicine physicians
- Check if CBT-I therapists are available in your area
- Online CBT-I programs (Insomnia Coach app is free)

REMEMBER:

You deserve good sleep. It's not a luxury. It's a fundamental health need. Keep working at it.
