UNDERSTANDING GESTATIONAL DIABETES

Gestational diabetes (GDM) is high blood sugar that develops during pregnancy. It affects 2-10% of pregnancies.

Key Facts:

- Usually develops around weeks 24-28
- Usually goes away after delivery
- Can be managed with diet, exercise, and sometimes insulin
- Monitoring blood sugar is essential
- You did NOT cause this - hormones from the placenta block insulin

Why Tracking Matters:

- Helps you see patterns in your blood sugar
- Identifies foods that spike your levels
- Provides data for your care team
- Gives you a sense of control
- Helps ensure healthy outcomes for you and baby

My diagnosis date: ____/____/____

Weeks pregnant at diagnosis: ____

Due date: ____/____/____

TARGET BLOOD SUGAR RANGES

These are GENERAL targets. Your doctor may adjust yours.

TIMING	TARGET (mg/dL)
Fasting (before breakfast)	95 or below
1 hour after meals	140 or below
2 hours after meals	120 or below
Bedtime	Ask your doctor

MY Personal Targets (from my doctor):

Fasting: ____ mg/dL

1hr after meals: ____ mg/dL

2hr after meals: ____ mg/dL

Bedtime: ____ mg/dL

When to call your doctor:

- Fasting BG consistently above ____
- Any reading above ____
- Feeling very thirsty/urinating a lot
- Decreased baby movement
- Blurred vision or headaches

GDM-FRIENDLY MEAL IDEAS

Focus on: protein + healthy fat + fiber + controlled carbs

BREAKFAST IDEAS

- Eggs + avocado + whole grain toast (1 slice)
- Greek yogurt + berries + nuts
- Oatmeal (1/2 cup) + peanut butter + seeds
- Veggie omelet + small fruit

LUNCH IDEAS

- Grilled chicken salad + quinoa + olive oil dressing
- Turkey + cheese wrap (whole wheat) + veggies
- Lentil soup + side salad
- Tuna + avocado + crackers (whole grain)

DINNER IDEAS

- Salmon + roasted vegetables + brown rice (1/2 cup)
- Stir-fry with chicken + vegetables + cauliflower rice
- Lean beef + sweet potato + steamed broccoli
- Baked chicken + green beans + small roll

SNACK IDEAS (15-20g carbs)

- Apple slices + almond butter
- Cheese + whole grain crackers
- Hard-boiled egg + veggies
- Small handful of nuts + berries

Foods that spike MY blood sugar:

POST-DELIVERY MONITORING

What to expect after your baby arrives:

Immediately after delivery:

- Blood sugar usually returns to normal
- You'll be tested 24-72 hours after delivery
- Breastfeeding can help stabilize blood sugar

Follow-up testing:

- 6-12 week postpartum glucose test
- Annual diabetes screening recommended
- Higher risk for Type 2 diabetes later in life

My post-delivery plan:

6-week test date: ____/____/____

Result: _____

Follow-up with: _____

Lifestyle changes I want to maintain:

Baby's birth date: ____/____/____

Baby's weight: ____ lbs ____ oz

Any complications: _____

EMOTIONAL SUPPORT

A GDM diagnosis can bring up many emotions.

All your feelings are valid.

How I felt when diagnosed:

Things I want to let go of:

- ☐ Guilt (this is NOT your fault)
- ☐ Fear about baby's health
- ☐ Frustration with food restrictions
- ☐ Overwhelm from monitoring
- ☐ Shame or embarrassment

Positive reminders:

- GDM is temporary and manageable
- You are doing an amazing job monitoring
- Every good choice helps your baby
- Many women with GDM have healthy babies
- You are stronger than you think

A letter to my baby:

EXERCISE & MOVEMENT LOG

Exercise helps control blood sugar. Aim for 30 min/day.

Safe exercises during pregnancy:

Walking, swimming, prenatal yoga, stationary bike

Pattern I notice: _____

Baby is most active:

Morning / Afternoon / Evening / Night

YOU'VE GOT THIS, MAMA.

Every number you track,
every healthy choice you make,
is an act of love for your baby.

You are not defined by a diagnosis.
You are a warrior growing life.

Wishing you a healthy, happy delivery!

With care, Daniel Tesfamariam
